

Water is Life

More than half your body is water.

You spent your first nine months of existence immersed in a watery cocoon.

Ancient Babylonian, Egyptian, and Hebrew creation myths all agree that water existed before anything else was created.*

And biologists tell us that the first primordial life forms emerged from water.

Water is fundamental to all life.

And yet...

- 1.1 billion people worldwide do not have access to safe drinking water.
- Less than 1 percent of the world's fresh water is readily accessible for direct human use.
- Every 15 seconds a child dies from a disease contracted through unclean drinking water.

Access to clean water:
It's a fundamental
human right.
